## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement (IDS) submitted on December 1, 2003 and July 19, 2004 has been considered by the examiner.

### ***Allowable Subject Matter***

2. Claims 1-60 are allowed.
3. The following is an examiner's statement of reasons for allowance: In the examiner's opinion, it would not have been obvious for an artisan of ordinary skill in the art to expose a packaging film comprising single-wall carbon nanotube materials to radiation as a way to increase the gas transmission rate. While the prior art teach irradiation of polymers, such as polyethylene to increase the gas transmission rates (see Tikhomirova et al PTO-1449, dated 7/2004), the prior art does not expressly teach and/or fairly suggest the inclusion of single walled nanotube material in said methods. Additionally the prior art, such as Ding et al (6,861,461) suggest ionomeric nanocomposite films comprising nanostructured materials, such as single-walled and/or multi-walled nanotubes; however, there is no disclosure and/or suggestion for an artisan of ordinary skill in the art to use irradiation exposure to increase the gas transmission rates. Especially since the reference (Ding et al) teaches the compositions comprising said nanostructured materials according to the invention form packages having increased gas barrier properties compared to various conventional packaging materials—see

column 15, lines 65-67 of Ding et al. There are also teachings in the prior art of dispersing carbon nanotube materials into polymer matrices, however these teaches do not expressly teach exposure to radiation nor mention/suggest increasing the gas transmission rate as suggest by the present invention. Therefore the examiner deems the instantly claimed invention is distinguished over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
